Summary —

Python and AI enthusiast with strong foundations in Python, Flask, and web development. Hands-on experience building projects such as Student Management Systems and AI-based chatbot applications using APIs like Sarvam.ai. Interested in developing intelligent web applications integrating AI features such as multilingual responses, PDF question answering, and text-to-speech.

Skills

- **Programming:** Python, Java
- **Generative AI:** Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents
- **Frameworks & Libraries:** LangChain (project-based), Flask, Gemini API
- **Databases:** MySQL
- **Developer Tools:** Git, Jupyter Notebook, VS Code, Postman

Education

Aditya Institute of Technology and Management

B.Tech in computer science and engineering

pursuing

Narayana Junior College, Vishakapatnam

June 2024

Intermediate (MPC)

Percentage: 94.4

Z.P.H. School, Haridasapuram

March 2022

Secondary School of Certificate (SSC)

Percentage: 90

Projects

Student Management System

Python, Flask, HTML, CSS, SQLite

- Developed a web-based Student Management System to manage student records efficiently.
- Implemented CRUD operations (Create, Read, Update, Delete) for student data using Flask and SQLite.
- Designed responsive frontend interfaces using HTML and CSS for adding and viewing student details.
- Built backend logic using Flask routes to handle form submissions and database operations.
- Integrated SQLite database to store student information such as name, age, and course.
- Used Jinja2 templates to dynamically display student data on web pages

AI Question Answering Agent

Python, Gemini API, Flask, HTML, CSS, API Integration (Sarovam.ai)

- Developed an AI-powered Study Assistant web application that helps students ask academic questions and receive response
- Integrated AI APIs to process user queries and generate answers in natural language.
- Built the backend using Flask to handle user requests and connect the frontend with AI services.
- Designed a simple web interface using HTML and CSS for students to interact with the chatbot.
- Implemented support for multiple input formats such as text and document queries.
- Enabled the system to respond in the same language as the user's question using AI capabilities.

Certifications

Data Structure in Python Programming -NPTEL

Python in Data Science - IBM

SQL and Relational Databases - IBM

AI Marathon - GmrIT(StepCone)
